

Full Stack Personal Portfolio Website Files

1. Frontend Setup (React)

Create React App

```
npx create-react-app client
cd client
npm install axios react-router-dom
```

client/src/App.js

```
import React from 'react';
import './App.css';

function App() {
  return (
    <div className="container">

      <header>
        <h1>Priya Dharshini</h1>
        <p>Python Developer | AI & ML Enthusiast</p>
      </header>

      <section>
        <h2>About Me</h2>
        <p>
          Engineering student passionate about AI,
          Machine Learning, Full Stack Development,
          and Deep Learning.
        </p>
      </section>

      <section>
        <h2>Projects</h2>

        <div className="card">
          <h3>Real Estate Price Predictor</h3>
          <p>Machine learning project using Pandas and Scikit-Learn.</p>
        </div>

      </section>

    </div>
  );
}
```

```

    <div className="card">
      <h3>Enterprise RAG Chatbot</h3>
      <p>AI chatbot using LangChain and Pinecone.</p>
    </div>

    <div className="card">
      <h3>Defect Detection System</h3>
      <p>Computer Vision system using PyTorch and OpenCV.</p>
    </div>

  </section>

  <section>
    <h2>Contact</h2>
    <p>Email: priyadharshini@example.com</p>
  </section>

</div>
);
}

export default App;

```

client/src/App.css

```

body {
  margin: 0;
  font-family: Arial, sans-serif;
  background: #f4f4f4;
}

.container {
  width: 90%;
  margin: auto;
  padding: 20px;
}

header {
  background: #222;
  color: white;
  text-align: center;
  padding: 40px;
  border-radius: 10px;
}

```

```
section {  
  margin-top: 30px;  
}  
  
.card {  
  background: white;  
  padding: 20px;  
  border-radius: 10px;  
  margin-top: 15px;  
  box-shadow: 0 2px 5px rgba(0,0,0,0.1);  
}
```

client/src/index.js

```
import React from 'react';  
import ReactDOM from 'react-dom/client';  
import App from './App';  
  
const root = ReactDOM.createRoot(document.getElementById('root'));  
root.render(  
  <React.StrictMode>  
    <App />  
  </React.StrictMode>  
);
```

2. Backend Setup (Node.js + Express)

Install Backend Packages

```
mkdir server  
cd server  
npm init -y  
npm install express mongoose cors dotenv  
npm install nodemon --save-dev
```

server/server.js

```
const express = require('express');
const mongoose = require('mongoose');
const cors = require('cors');
require('dotenv').config();

const app = express();

app.use(cors());
app.use(express.json());

mongoose.connect(process.env.MONGO_URI)
  .then(() => console.log('MongoDB Connected'))
  .catch(err => console.log(err));

const projectSchema = new mongoose.Schema({
  title: String,
  description: String
});

const Project = mongoose.model('Project', projectSchema);

app.get('/projects', async (req, res) => {
  const projects = await Project.find();
  res.json(projects);
});

app.post('/projects', async (req, res) => {
  const project = new Project(req.body);
  await project.save();
  res.json(project);
});

app.listen(5000, () => {
  console.log('Server running on port 5000');
});
```

server/.env

```
MONGO_URI=mongodb://127.0.0.1:27017/portfolioDB
```

3. MongoDB Example Data

```
{
  "title": "Enterprise RAG Chatbot",
  "description": "AI chatbot using LangChain and Pinecone"
}
```

4. Root package.json Scripts

```
{
  "scripts": {
    "client": "npm start --prefix client",
    "server": "nodemon server/server.js"
  }
}
```

5. Run Frontend

```
cd client
npm start
```

6. Run Backend

```
cd server
nodemon server.js
```

7. Project Folder Structure

```
personal-portfolio-website/
|
├─ client/
|   └─ src/
|       └─ App.js
```

```
| | | App.css
| | | index.js
|
| | server/
| | | server.js
| | | .env
|
| | package.json
| | README.md
```

8. Deployment

Frontend Deployment

- Deploy React frontend using Vercel.

Backend Deployment

- Deploy Node.js backend using Render or Railway.

9. GitHub Push Commands

```
git init
git add .
git commit -m "Portfolio project upload"
git branch -M main
git remote add origin https://github.com/priyadharshini07082007-hue/personal-portfolio-website.git
git push -u origin main
```

10. Technologies Used

- React.js
- Node.js
- Express.js
- MongoDB
- HTML
- CSS
- JavaScript

11. Final Outcome

This project demonstrates:

- Frontend development
- Backend API development
- Database integration
- Full-stack architecture
- GitHub deployment workflow
- Cloud hosting deployment
